## TavenMoore.com Homepage

Personal author site and blog built on the Wordpress blogging software and heavily modified from the Journalcrunch theme. The homepage has a slightly different layout than the individual post pages, with large pictures and call-to-action icons inviting the user to access recent blog posts.

The overall design focused on whimsical fun without sacrificing ease of use or readability for large blocks of text. A primary focus was on slimming down the information "above the fold" so that users were granted immediate access to content. The menu is minimalist, taking up as little space as possible and offering submenus for deeper browsing. Search is easily located in the upper-right corner, and social networking icons with hover effects are permanently available. The footer contains tertiary information for alternate methods of navigating the site.

## TavenMoore.com Content Page

The content pages for the TavenMoore.com site introduce a new design element—the right sidebar. This sidebar assumes that the reader is already invested in their browsing of the site and offers additional resources, such as quick-links to book sales (most important, therefore at the top), current work in progress meters, random art, currently reading, and pinterest boards.

## Choose: An Interactive Steampunk Webserial

This Wordpress installation was built on the bare, 2010 theme and incorporated bold colors, orange accents, and plenty of gears for a steampunk look-and-feel. The primary focus of the site was interactivity, ensuring that visitors had immediate access to information about what kind of site they'd found, polls, and comments. Only after those goals were met could things like book sales and decorative art be taken into account to fill out the left sidebar.

## Old TamiMoore.com Website (*Deprecated*)

A previous incarnation of the TavenMoore.com website, this design focused around the art style of the site owner, incorporating pinks, pale yellows, and teals for accent colors. Colored pencil art pieces were developed specifically for this site, including the header image and the homepage content icons. Overall, the design was refined for the current TavenMoore.com, aiming at for a more professional appearance.

## Taven Moore Wiki

The wiki is a re-skin of a PMWiki installation, built upon the Drop Shadow theme by David Gilbert. Design specifications required that it be easy on the eyes, as it would be displaying long tracts of text. Additionally, the site should hearken back to the TavenMoore.com website, which was accomplished through the use of similar colors (grays, teal accents) and logo reuse. Header tags were styled to generate a lot of white space and text interruption, to keep the eyes from glazing over when bouncing through tracts of information.
